

Plus English Programs (Add-on) Coding

RENNERT
BREAK THE LANGUAGE BARRIER®

New York

What is Coding?

Coding is the language of the 21st century—Every app, website and business relies on code to operate and anyone can write code. Don't wait—get ahead. Start coding and creating now!

Why is Coding important?

Code creates every piece of technology that we interact with. Every child, future professional and business owner should understand the fundamentals of coding and how they can use it to bring their ideas to life. Become a beginner or intermediate developer in just **2 weeks or 4 weeks** with **Rennert's English Plus Coding** program and develop your own personal website using HTML, CSS and JavaScript!

Classes—no experience necessary!

Take Vacation 'N Learn® or Rapid Progress 20 or 25 at Rennert New York, and then take **professional coding classes** at the New York Code + Design Academy three afternoons per week (total of 10 hours per week). Choose the right course for you:

2-Week Course

Introduction to Web Development: This course deals with the basics of customizing the look and feel of a website.

July 3-15 ■ July 31-Aug. 12

- Learn HTML + CSS (coding languages that customize how web pages look)
- Build your own static website

4-Week Course

Front-End Web Development: This course gives students the skills to build a responsive and dynamic website.

July 3-July 29

- Learn HTML + CSS + JavaScript (the addition of JavaScript adds interactivity to websites and is a good introduction to programming languages)
- Build your own website with responsive design features (adjusting for mobile/tablet/web)
- Add functionality and animation to your website

About New York Code + Design Academy

New York Code + Design Academy is a rapidly expanding coding and programming school with locations around the world. NYCDA trains both beginner and dedicated developers with hands-on, intensive workshops in web and mobile app development. The New York school is located in the heart of the Financial District and facilities are open 24/7 to students, with free access to WiFi, snacks and drinks, and supporting staff to help students on their web development projects.
